

SYED M.AUN NAQVI

Karachi, Pakistan.

Cell: 0310-2823766

Email I'd: aun.naqvi@gmail.com

GitHub Profile: [aunrazanaqvi](https://github.com/aunrazanaqvi)

LinkedIn: <https://www.linkedin.com/in/aun-naqvi-70b940275/>

OBJECTIVE:

I'm a frontend web developer with a strong focus on React.js, JavaScript, Redux, and Axios, dedicated to building responsive and engaging web applications. I excel at transforming complex designs into intuitive, user-friendly interfaces, ensuring high code quality and performance optimization. My collaborative approach drives teams toward shared goals, making a lasting impact within the organization.

CORE STRENGTH:

Technical Skills: React.js, JavaScript, TypeScript, Redux, Axios, HTML, CSS, Git, RESTful APIs, Webpack, Material-UI, Ant Design, React-Bootstrap, Localization (i18n), Cypress.

Professional Skills: Frontend Development, Responsive Design, User Interface Development, State Management, Performance Optimization, Code Quality, Cross-browser Compatibility, Unit Testing, Agile Methodologies.

Soft Skills: Logic Building, Problem-solving, Adaptability, Team Leadership, Communication, Collaboration, Time Management, Organizational Skills

EXPERIENCE:

Executive Software Engineer – MindsCollide Private Limited (April 2022 to Present)

Area of Responsibilities Included:

- Developed responsive and user-friendly software by applying best practices in modern web design and development.
- Leveraged front-end technologies including React.js, Bootstrap, Ant Design, Tailwind CSS, and Material UI, ensuring seamless integration with APIs.
- Implemented JWT authentication for secure user access, enhancing application security and session management.
- Enabled real-time communication through the implementation of Socket.IO and MQTT for notifications and live data updates.
- Crafted clean and efficient JavaScript and ES6+ code, resolving UI/UX issues and improving application performance and maintainability.
- Streamlined development workflows using GitHub for version control and Postman for API testing.
- Designed intuitive front-end architecture with a strong focus on performance, responsiveness, and user experience.
- Maintained comprehensive documentation covering project architecture, API contracts, design decisions, and deployment practices.

PROJECTS:

Lets Diskus – Meeting Solution Services

- Utilized React, Redux, and Axios to create a comprehensive meeting solution service
- Developed intuitive and responsive user interfaces with Material UI, Ant Design, and React Bootstrap
- Implemented real-time notifications using Socket.io and MQTT
- Enabled multilingual support through localization (i18n)
- Optimized front-end performance for fast load times and smooth interactions
- Utilized GitHub for version control and efficient project management.

RER – Management System

- Used React and Redux for efficient state management.
- Designed intuitive interfaces with Ant Design, Material UI and React Bootstrap for enhanced user experience.
- Integrated RESTful APIs to ensure reliable and secure data communication.
- Optimized front-end performance for fast load times and smooth interactions.
- Managed version control and project organization with GitHub

BLANCSPACE – Finding nearest places

- Blanc Blancespace helps users find the nearest places like Restaurants, Hotels, Malls, Cafes, Parks, and more based on their current location.
- The frontend is built using React.js, leveraging its component-based architecture for a dynamic user interface.
- Integrated RESTful APIs to ensure reliable and secure data communication.
- Redux is used for handling complex state management, ensuring efficient data flow and consistency across the application.

PAD – Personal Account Dealing

- A Personal Account Dealing (PAD) system enables secure pre-trade authorization and post-trade compliance monitoring to ensure adherence to regulatory and ethical standards.
- Implemented Redux and Context API for scalable global and local state management, ensuring efficient data flow and consistent application behavior.
- Built the user interface in React.js, making use of its modular architecture to create a dynamic and efficient frontend experience.
- Integrated RESTful APIs to ensure reliable and secure data communication.

QUALIFICATION:

PAF-KIET Bachelor's Degree in Computer Science (Dec 2022)

TRAINING & CERTIFICATIONS

- **React JS** – React JS For Beginners (Lynda.com).
- **Javascript** – Javascript Essential Training (Lynda.com).
